**2026 LMIG CONTRACT
ADDENDUM NO. 2**

This Addendum is issued on behalf of the Wayne County Board of Commissioners and is hereby incorporated into the Proposal Documents. All prospective bidders must consider the following revisions and clarifications in preparing their proposals. Bidders are required to acknowledge receipt of this Addendum in the Bid Form. Failure to do so will render the proposal non-responsive.

Addendum Item – Clarification to Bid Form:

Bid Form Item 2: 6" Depth Soil Cement Reclamation – CSRB (315-1000)

A question was received regarding the cement spread rate for the 6-inch compacted depth soil cement stabilized reclaimed base (CSRB) per GDOT Section 315.

For bidding and estimation purposes, use a typical cement spread rate of 40 lb/sy (pounds per square yard). This rate is appropriate for decent (moderate to good quality) existing soils and base materials, which are anticipated at this site based on preliminary assessments. It corresponds roughly to a cement content in the 4–5% range by dry weight of the reclaimed mixture (assuming typical in-place dry densities around 110–120 lb/ft³).
