Shirt Size: (When in doubt order a larger size!) YS YM YL AS AM AL AXL AXXL

PARTICIPANT'S NAME- AGE-

CIRCLE ONE: MALE FEMALE YEARS EXPERIENCE: (Age Child will be on Control Date)

BIRTH CERTIFICATE ON FILE- (Circle) Yes or No DATE OF BIRTH-

PHONE: (Best/Others) Text Msg, Cell/Provider-

Email: School:

Would you like to play in - (Circle) Jesup *Odum *Screven

*Child must live or attend school in Odum or Screven to play in Odum or Screven; however you can choose to play in Jesup.

Volunteers are needed, are you willing to coach/assist a team? (Circle) YES NO

Jersey Size (Coach Only): AS AM AL AXL AXXL AXXXL

If you have submitted a SPECIAL REQUEST note the name and age of the other child in that request

(REQUESTS ARE NOT GUARANTEED!)

If you have SIBLINGS that are in the same age division that need to be on the same team, note their NAMES and AGES-

Parent's Name-

Street Address-

City, State, Zip Code-

Explain any medical, physical, or other conditions that we should be aware of-

In consideration of my (and/or my child's) participation in this activity, I hereby release and discharge the Wayne County Parks & Recreation Department (WCRD), and its representatives, successors, and assigns, from any and all liability arising from accident, injury, and illness that I (he/she) may suffer as a result of my (our) participation in this activity. I (we) also will follow the rules and regulations set by WCRD and above named parties. Parent or guardian must sign for anyone age 18 and under. I do hereby grant and give these groups the right to use my or my child(s) name, both singly and in conjunction with other persons or objects and presentations, advertising, publicity, and promotion relating thereto. WCRD encourages all attempts to increase attendance and reduce truancy in our school system. This may include, but is not limited to players being asked about attendance and truancy by the coach.

CONCUSSION DANGER SIGNS

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body s/he exhibits any of the following danger signs:

- One pupil larger than the other
 - Is drowsy or cannot be awakened
 - A headache that not only does not diminish, but gets worse
 - Weakness, numbness, or decreased coordination
 - Repeated vomiting or nausea
 - Slurred speech
 - Convulsions or seizures
 - Cannot recognize people or places
 - Becomes increasingly confused, restless, or agitated
 - Has unusual behavior
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

WHY SHOULD AN ATHLETE REPORT THEIR SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brain. They can even be fatal.

It's better to miss one game than the whole season. For more information on concussions, visit: www.cdc.gov/Concussion.

Remember

Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care professional, experienced in evaluating for concussion, says s/he is symptom-free and it's OK to return to play.

Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration, such as studying, working on the computer, or playing video games, may cause concussion symptoms to reappear or get worse.

After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.
