Name of Applicant: _____

Date: _____

Phone Number: _____

Email Address: _____

Current Parcel Number: _____

New Parcel Number (if applicable): _____

Reason for Address: _____

Old Address (if updating): _____

New Address: _____

You will need to mark the approximate location of the structure to be addressed on a copy of the tax map. If the structure is not visible from the road you will need to mark the location of the access ramp.

RV's will use an existing address for the property unless there is not an existing address. In that case one will need to be created.

If you are accessing a County road and a culvert is required, then it must be made of concrete. Contact the Road Dept to see if you need a culvert. Contact GDOT if you are accessing a State Hwy.

Fun fact: Address numbers are measured in "clicks". If your address is 500 then you are ½ mile from the start of your road. Right side of the road is even number. Left side is odd number. Having an accurate address number is helpful for the Post Office and Emergency Services.
